When a life is on the line, having the right tools is critical. H&H Medical Corporation (formerly H&H Associates) emergency first aid products have proven themselves in the field under real-world conditions. Military-grade and battle tested, our products give those wounded in the field and away from immediate medical care a chance for survival.

H&H’s emergency care products are designed to save lives from the most common preventable deaths in the field: excessive bleeding, tension pneumothorax, and obstructed airways. We use high quality, highly durable materials to support use under any conditions.

As the developer and manufacturer, H&H creates custom kits and solutions in order to meet any user’s needs. Check out all of our emergency care solutions and contact us for more information and how to order our products.

Bolin Chest Seal

Sucking chest wounds require an emergency first aid solution that is fast, direct, and effective: the H&H Bolin Chest Seal (BCS) is specifically engineered to meet these critical needs.

The BCS is a sterile occlusive chest wound dressing for treating open pneumothorax and preventing tension pneumothorax that result from gunshot, stab wounds, or other penetrating chest trauma. The patented (US Patent No. 7,834,231) failure-proof triple-valve design of the BCS allows air and blood to escape while preventing the re-entry of either, thereby eliminating any unwanted gas or liquid exchange at the trauma site.

The large (6” diameter), rugged polyurethane disc structure of the BCS can cover practically any size chest trauma site. The temper of the disc prevents any disc wrinkling from occurring during application.

The H&H Wound Seal Kit provides a fast application for sealing wounds quickly to stop external bleeding. The Wound Seal Kit is a sterile, TCCC-compliant occlusive dressing that comes vacuum sealed with a 6”x8” plastic sealing rectangle and hydrogel adhesive to stick to the wound and the surrounding skin through blood and debris. Along with the wound seal, the kit comes with a sterile 8” x 7.5” ABD Pad. The sealing rectangle has the same polyurethane carrier and adhesive as the Bolin Chest Seal.

Our new redesigned seal comes with rounded edges to reduce friction with clothing. We’ve also added a new long tab to one end to allow for venting and easy removal and repositioning of the seal over the injury.

Introducing the new H&H Tension Pneumothorax Needle. This is a 14 gauge by 3.25 inch needle and catheter for use in the management of combat casualties who present with the signs and symptoms of a tension pneumothorax.

This device meets 100% of the requirements for fit, form and function that is listed for NSN 6515-01-541-0635. The needle and catheter are protected from bending or damage and harsh environmental conditions while in your kit by a hard plastic case.

The H&H Emergency Chest Tube Insertion Kit contains the tools needed in emergency situations to perform a chest intubation. Our vacuum sealed and sterile kit contains:

- One PriMed Gauze
- One H&H Wound Seal
- Two Rochester-Pean Forceps
- One Mayo Hegar N/H
- One #10 Scalpel
- One Argyle Chest Tube
- One Ethicon Silk Suture
- One Ethicon Silk Suture
- One Heimlich Drain Valve
- One Petroleum Gauze
- One Super Combat Cravat

Our kit is carefully packed and vacuum sealed to create a small, light package that can be stored in any trauma or advanced first aid kit.
